

LIST OF EXHIBITS

Exhibit 1: Analytical Work Zone Decision Framework - Modeling Approaches (Source: (9)) 5

Exhibit 2: Work Zone Strategies and Operational Impacts (1)..... 7

Exhibit 3: Work Zone Impacts and Analysis Tools (1) 8

Exhibit 4: Device Configuration for Capacity Analysis (18) 11

Exhibit 5: Summary of Site Characteristics (20) 12

Exhibit 6: Work Zone Capacity Count Location (25). 14

Exhibit 7: Hourly Speed-Volume Curve Used in QUEWZ (26)..... 15

Exhibit 8: Observed Speed Distribution Upstream of Lane Closure (20) 17

Exhibit 9: Speed-flow curves for work zones (27)..... 19

Exhibit 10: Highest Sustained 15 Minute Flows (27)..... 19

Exhibit 11: Hypothesized Relationship of Freeway Speed Flow Relationship (18). 20

Exhibit 12: Observations of North Carolina and Texas Work Zone Capacities (18)..... 21

Exhibit 13: Data on Short-Term Freeway Work Zone Lane Closure Capacity (24)..... 21

Exhibit 14: Observed Traffic Capacity Values at Freeway Work Zones at Different Zones in Indiana (27)..... 23

Exhibit 15: Capacity Means and Confidence Intervals (27)..... 23

Exhibit 16: Crossover Work Zone. (27) 23

Exhibit 17: Work Zone Capacities, Queue-Discharge Rates and Vehicles Speeds (27) 24

Exhibit 18: Mean Capacity Observations at Six Study Sites in Canada during Weekdays, Peak Period, Daylight, and Clear Weather Conditions (28)..... 25

Exhibit 19: Recommended Adjustment Factors for the Proposed Capacity Model (28) 26

Exhibit 20: TRAFFIC.com Sensor Locations in Triangle Region 28

Exhibit 21: Lane-by-Lane Sensor Data – No Lane Closure Effect Visible 29

Exhibit 22: Lane-by-Lane Sensor Data – 4-to-2 Lane Closure Effect Visible 30

Exhibit 23: Conceptual Architecture for FREEVAL-WZ Software Tool 34

Exhibit 24: Rural Hourly Traffic Volume Profile (29)..... 35

Exhibit 25: Urban Hourly Traffic Volume Profile (29)..... 35

Exhibit 26: VOC Estimation Guidance (adapted from (30) and (31))...... 38

Exhibit 27: Sample Size for Work Zone Scenarios 39

Exhibit 28: Work Zone Lane Closure Sample Size by Sensor 40

Exhibit 29: Lane-by-lane Confirmation Statistics 40

Exhibit 30: Lane Closure 4-3 Speed-Flow Diagram..... 42

Exhibit 31: Lane Closure 4-2 Speed-Flow Diagram..... 43

Exhibit 32: Lane Closure 4-1 Speed-Flow Diagram..... 44

Exhibit 33: Lane Closure 3-2 Speed-Flow Diagram..... 45

Exhibit 34: Lane Closure 3-1 Speed-Flow Diagram..... 46

Exhibit 35: Lane Closure 2-1 Speed-Flow Diagram..... 47

Exhibit 36: NC-Proposed Lane Closure Speed and Capacity Estimations Summary 48

Exhibit 37: Recommended WZ Capacity by lane closure scenario (pcphpln) 49

Exhibit 38: Suggest FFS Based on Lane Closure Scenarios..... 49

Exhibit 39: Estimated WZ Capacity by lane closure scenario (pcphpln) 50

Exhibit 40: Overview of Validation Facility and Lane-Closure Scenarios 52

Exhibit 41: Work-Zone Volume Relative to Peak Flow..... 53

Exhibit 42: PM Peak-Hour Speed Contour Plots..... 55

Exhibit 43: Summary of Scenarios and CAF Inputs..... 57
